**DETAILED ACTION**

***Allowable Subject Matter***

Claims 5-19, 30-34, and 36 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 5, 11, 12, 13, 18, 19, 30, and 36 each require a comparison that calculates a degree of similarity between a target area selection feature and a comparison segment of a stored area selection feature, and repeats calculating while shifting the comparison segment one by one in the stored area selection feature and searches for an area of the stored area selection feature most similar to the target area selection feature. Wells et al. do not disclose or suggest a one by one shifting of the comparison segment to search for a stored area selection feature most similar to the target area selection feature. Nor is it readily apparent how one of ordinary skill in the art would modify Wells et al. to accommodate such a feature.

Claim 34 requires a target area selection nonlinear quantization step and a stored area selection nonlinear quantization step. Wells et al. do not disclose or suggest calculating an element of a selected target nonlinear quantized feature or calculating an element of a selected stored nonlinear quantized feature.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
